Sorry, which way is better? Try to switch it to foodservice/bags, or use this laundry list?

The way this is done it would be fine and in some ways better.

Best Regards

Keith Christman

Thanks for letting me know they reached out. What EPA noted below is what I had meant in my other emails to just add other plastics applications to the list. I understood your preference to be to reference foodservice and retail bags over this approach though, is that right?

Subject: [EXTERNAL] Innovation Challenge Language question from EPA

John,

We were asked by EPA about:

. This could include innovations such as single use plastics, reusable packaging, fishing gear, construction materials and durable consumer goods using science based and life cycle decision making."

That would be fine from our perspective.

Best regards,

Keith
